

Feedback for RRMP Literature Review Summative

Tutor completing summative feedback: Karen Outram	Student number: 305069
Details of any extensions etc:	Submission Attempt: First submission Second submission

Criteria and weighting	Level	Comments
Knowledge and understanding of the topic/ issues under consideration (30%) To provide an overview of current knowledge on the chosen topic	Satisfactory	Noted there are four areas of investigation you've chosen regarding the assignment, and you've stated this is to limit the amount of content reviewed. It is far better in small scale assignment to have one core focus running through the content given that you only have 2,000 words to cover the subject. Focused research on a topic provides deep research and so please do remember this for your Capstone project. Under vulnerabilities there is an extensive quote. Use your own academic voice to discuss a point and then draw through appropriate sections of quotation to underpin the point you've made. Don't rely on quotation to reflect the point you want to make. The assignment relies on intrinsic as opposed to theoretical knowledge of the topic, as a lack of citation reflects that words written are from your own knowledge. It is important to give credit to authors, and so where research does take place, cite.
Criticality (30%) To highlight similar and contrasting views on your chosen topic	Satisfactory	Content is very descriptive. The assignment relies on listed and bullet pointed discussion for the most part, with some quotation used and cited to underpin particular points. You need to focus on deep research and appropriately synthesising discussion. In a Literature Review the content needs to be about researched literature and should not hinge on personal professional practice for large areas of the content. You also need to use synthesised discussion with full sentences and paragraphs as opposed to sectioning the discussion with lists and bullet points.
Use of relevant sources (20%) To demonstrate an awareness of relevant, current literature	Weak	Take all opportunities to cite. Where there is a fact/research then ensure citation occurs. This is important to give full credit to the author/source of information. There is very limited citation occurring in your assignment, with whole sections that have no citation at all. Expressing personal intrinsic knowledge does not circumvent the need for citation. This assignment is a Literature review. A Literature

		review particularly requires an academic approach, because it is about the examination of Literature, and citing and referencing research. It will be important to bear this in mind for your Capstone project. Please also note that academic references need to be in alphabetical order. Bullet points are not required at the side of the reference list, and all should align to the left-hand margin with clear spaces in-between. This is weak outcome here.
Structure and Presentation (as detailed in the assessment guidance) (10%) To showcase your research and writing skills.	Very Good	The assignment is generally laid out to a very good standard. Presentation is structured and logical. You should apply page numbers to your document and a title page and contents page give the document added professional finesse and so this is worth bearing in mind for future summative. Listing and bullet points are acceptable in assignments but these should be limited and used only where absolutely necessary. Noted you've used an 'Annexe' in your assignment. It is more appropriate to state 'Appendices'.
Academic integrity (10%) To showcase your research and writing skills.	Satisfactory.	The assignment is within word count, and this is appropriate. The title chosen for the assignment is from the University of Essex list and this is good practice. You have an emerging academic writing style, but to fully gauge your academic tone of voice, your assignments need to have a more academic focus regarding their content and context, [please see comments regarding citation].
Overall		
Positives: <ul style="list-style-type: none"> • The general presentation of the assignment is completed to a very good standard • The assignment is within word count • The assignment was handed in on time 		
Points for development: <ul style="list-style-type: none"> • Citation needs to occur much more regularly • Personal professional knowledge is not a substitute for underpinning theoretical research. Personal professional practice should still be underpinned with theoretical comparison • Quotes are used to 'open' discussion and this is where most citation takes place. Quotes are there to support a point you make and underpin a discussion you are having in the assignment and not the other way around • A literature review relies on the discussion of and referencing of Literature primarily, and so moving forward consider what the summative requires of you.
