

Feedback for RRMP Research Proposal Presentation [Formative]

Tutor completing formative feedback: Karen Outram	Student number: Yash Roongta
Details of any extensions etc:	Submission Attempt: Formative

Thank you for submitting your formative.

Noted through your content you have mentioned primary research, however primary research can only be engaged with through the Capstone project and not in this module. I appreciate you may be looking forward to your Capstone project, but in this RMPP module please only engage with existing secondary literature from existing literature sources and don't engage with any research from people.

Good to see that you have started to collate some literature research references. For your actual summative, ensure you have engaged with deep research in a focused manner, relating to a core concept of research so that you are able to achieve deep research and critical discussion of the subject. Don't let tangents occur in your research.

Remember to cite regularly through all parts of your summative, and to ensure that reference lists are part of your submission. Ensure that all content is academically structured and so for example for your transcript, ensure this is written in full sentences, and paragraphs again with citation and reference list added.

This feedback can be used as part of your artefacts for your e-portfolio summative.

***The comment is added to every student formative feedback sheet:** Please ensure that when you complete your summative submission for the Research Proposal Presentation, that the research, content and context is **COMPLETELY DIFFERENT** to your Literature Review. This is for several reasons; you need to avoid self-plagiarism, [if content is close to or similar to the Literature Review TURNITIN will detect this], a summative can only be graded once and so if your LT and RPP are too similar theoretically it is the same piece of work and summative academic work has to 'build' upon research so that every summative submission is different from the previous summative submission. *This is a standard academic rule in all academic writing/summative submission.* And so, you can 'build' upon your subject from the Literature Review to the Research Proposal Presentation, but it **MUST** be different from the Literature Review.

The burden of ensuring each summative is 'new' rests with the student, and so please do observe the above when completing all summative submissions, thank you.

Wishing you the best of luck now for your actual summative submission,

With best wishes

Karen
